# Komponent bibliotek

Komponenter som inneholder flere grensesnitt-elementer. Gjerne fullstendig desktop-erstatte.

## ActiveWidgets

<http://www.activewidgets.com/>

\$395 - Developer license, \$2450 - Site license  
IE / Firefox

Utviklerlisens er for én utvikler mot ubegrenset antall programmer, site lisens brukes dersom flere utviklere skal jobbe på den samme applikasjonen. Pro-utgaven er under utvikling, og skal legge til støtte for Safari og Opera.

- grids, trees, tabs, combo and many other web GUI components
- works with any backend (ASP.NET, Java, PHP) or static HTML pages
- great tool for building AJAX applications
- compatible with ASP.NET AJAX, DWR, Prototype and other frameworks.

## ASP.net AJAX

<http://ajax.asp.net/>

\$0

<http://ajax.asp.net/showcase/default.aspx?tabid=47>

Tidligere kjent som Microsoft Atlas.

## Backbase

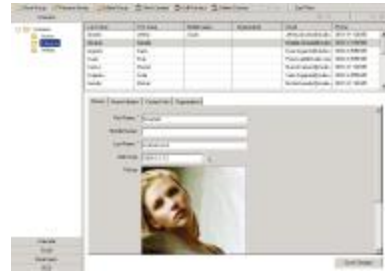

<http://www.backbase.com/>

STOP\_SECRET

[http://www.backbase.com/products/ajax\\_demos/](http://www.backbase.com/products/ajax_demos/)

"operates on all browsers"

Inneholder et enormt bibliotek av komponenter for visning og redigering av data.

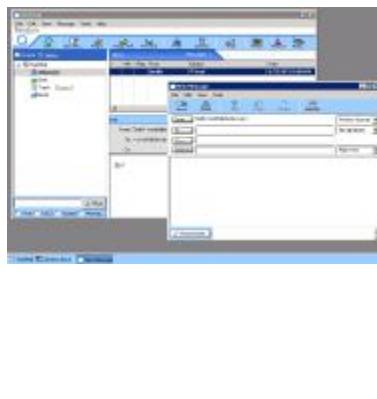

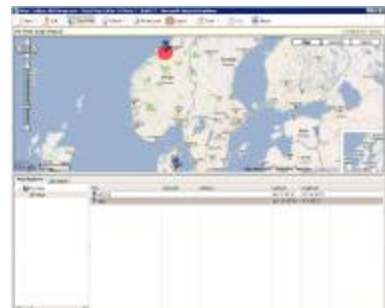

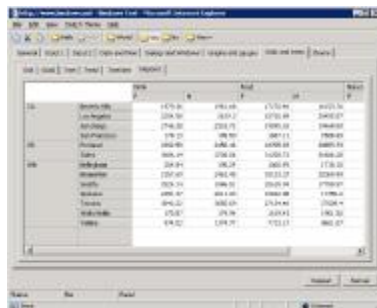

- is fully based on open Internet standards (XHTML, CSS, JavaScript, XML)
- doesn't require plug-ins and operates on all browsers
- offers over 50 out-of-the-box AJAX widgets (including source code)
- runs on any platform (e.g. J2EE, .NET, PHP, Coldfusion, or XML)
- is easy to learn and significantly improves your productivity

## Bindows

<http://www.bindows.net/>

\$495 - Developers Kit, \$199++ - Deployment fee

<http://www.bindows.net/demos/>

Opplever at enkelte av applikasjonene på demo-sidene henger nettleseren veldig før oppstart. Vet ikke om det er en feil i biblioteket eller en feil i bruken av det.

### 1. Richest GUI

With Bindows you can develop web applications that look and feel like Windows applications. Bindows even supports themes so you can easily change the looks of your whole applications.

(Also, from [Samples](#), run the AppLauncher and try the test applications included in the Bindows API).

### 2. Zero Footprint

Bindows applications require no end-user downloads - TRUE zero-footprint (no Java, Flash, plug-ins or ActiveX are used).

### 3. Full & Complete

Bindows provides the most full and complete components library (our major enterprise customers told us after they conducted an extensive study).

**4. OOP - Yes, HTML - No!**

Bindows is fully class based, Object Oriented API. It provides a complete windowing system with a wide array of supported widgets including menus, forms, grids, sliders, gauges and more. In Bindows you do not need to know or write one line of html.

**5. Accessibility (section 508)**

After a huge effort on our part, Bindows now enables you to develop fully accessible, rich-GUI applications. For more details, see our [508 page](#).

Please read the Federal Computer Week (FCW) article on Bindows accessibility support at <http://www.fcw.com/article94879-06-13-06-Web>.

**6. Vector Graphics & Charting Capabilities**

Bindows supports charting on all its supported browsers. Also, please read about Bindows Graphical Links API (GL-API) in [Graphical Links API](#).

**7. Internationalization & Localization**

Bindows provides full support for internationalization and localization. Localized Bindows applications (including combined locales) are in use across the globe. Checkout the Bindows localized sites under [worldwide](#)

**8. Pace of Development**

Bindows is leading the Ajax market from its inception (we provided those capabilities even before the term Ajax was coined). In the coming major release of Bindows we are providing full bi-directional data-binding (including transactional systems in browsers).

**9. Proven (enterprise) and Mature**

Bindows is an established and mature technology and we are commitment to performance. Bindows based applications are in use by most Fortune 100 corporations. As such, we have extensive experience working with business enterprise users - achieving aggressive performance in large scale applications. Additional Bindows enterprise development tools include the Bindows Linker, Bindows Compiler, and the Bindows Benchmark). [See some screenshots](#) of commercial Bindows-powered applications, provided by several of our customers.

**10. SPI and MPI**

The Bindows framework supports development of both single page interface (SPI) applications and multiple page interface (MPI) applications, and again, you do not need to write one line of html.

## Dojo

<http://dojotoolkit.org/>

<http://dojotoolkit.org/demos/>

\$0 - Donation ware

Safari 2+, Opera9+, IE 6+, FF 1+, Konqueror 3.5+

Lion

Fisheye

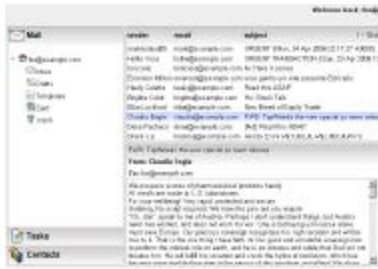

Email test

Et fåtall komponenter for noen enkle oppgaver. Fokuserer på bruk av SVG grafikk-filer.

# Google Web Toolkit

<http://code.google.com/webtoolkit/>

\$0 - Apache 2.0 license

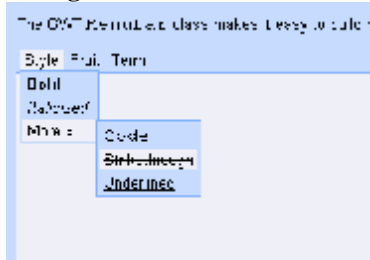

**Mail demo**

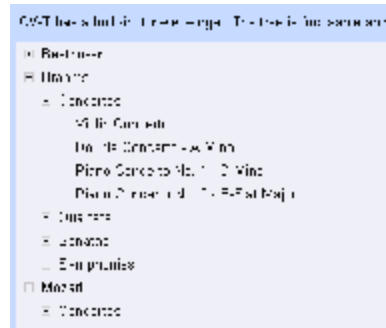

**TabPanel**

**DialogBox**

**MenuBar**

**Tree widget**

Google Web Toolkit (GWT) is an open source Java software development framework that makes writing AJAX applications like [Google Maps](#) and [Gmail](#) easy for developers who don't speak browser quirks as a second language. Writing dynamic web applications today is a tedious and error-prone process; you spend 90% of your time working around subtle incompatibilities between web browsers and platforms, and JavaScript's lack of modularity makes sharing, testing, and reusing AJAX components difficult and fragile.

GWT lets you avoid many of these headaches while offering your users the same dynamic, standards-compliant experience. You write your front end in the [Java](#) programming language, and the GWT compiler converts your Java classes to browser-compliant JavaScript and HTML.

# JackBe Presto

<http://www.jackbe.com/>

\$STOP\_SECRET

Electronic Health Records

Online Real Estate Site

Consumer Billing Demo

Tupperware logistikk

Hvis noen skulle få pris for styggeste design på demoer ever, burde disse gutta fått gullmedaljen. Fokuserer på logikken bak i stedet for designet på komponentene. Utseendet er opp til en designer, ikke hvordan deres komponenter ser ut.

# Nitobi

<http://www.nitobi.com/>

\$549 - Subscription license

<http://www.nitobi.com/products/completeui/demos/explorer/>

Spotlight

Sett med komponenter. Spesielt spotlight-funksjonen (øverst til høyre) er interessant. Kan godt erstatte tips-systemet vi har den dag i dag.

- 9 cross-browser, enterprise-grade Ajax components
- Cross platform support including Java, ASP.NET, PHP, Classic ASP, and Coldfusion MX
- An advanced Ajax datagrid featuring livescrolling, in-place editing, and rich editor widgets

- Richly designed Ajax tree, tab, and fisheye components for web navigation
- Includes Nitobi Ajax Toolkit used in all components, which can also be used in your web applications
- Subscription based, per developer, royalty-free licensing. Quarterly release schedule.

## Rialto

<http://rialto.application-servers.com/wiki/>  
<http://rialto.application-servers.com/demoRialto.jsp>

\$0 - Apache license

**Tabs: drag and drop, selection..**

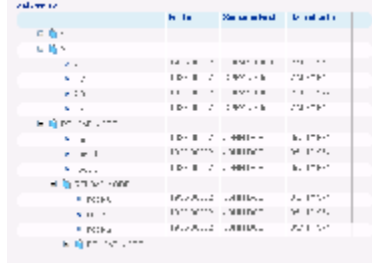

**Trees**

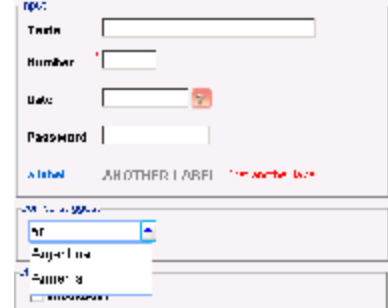

**Grid**

**Popup**

**GridTreeview**

**Forms**

Rialto (Rich Internet Application Toolkit) is ajax-based cross browser javascript widgets library. Because it is technology agnostic it can be encapsulated in [JSP](#), [JSF](#), [.Net](#), [Python](#) or [PHP](#) graphic components. Nowadays it supports pure javascript development and JSP/taglib development. A JSF, python, .Net and PHP integration are on the road. The purpose of Rialto is to ease the access to rich internet application development to corporate developers. Ideally a Rialto developer have neither need to write or understand DHTML, Ajax or DOM code.

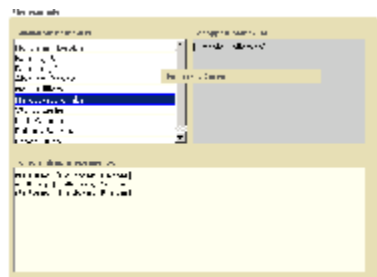

The target of Rialto is corporate web applications and not internet web sites.

Widgets library includes : forms, drag & drop, tree, data list with fix header and resizable columns, pop up, splitter.

## Rico

<http://www.openrico.org/>  
<http://www.openrico.org/demos>

\$0 - Apache 2.0 license

**Custom draggable**

**Pull down**

**Accordion**

# Script.aculo.us

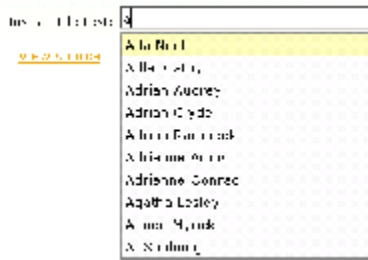

<http://script.aculo.us/>

<http://wiki.script.aculo.us/scriptaculous/show/Demos>

\$0 - MIT License

Drag and Drop Ajax Cart

Autocompleting Ajax text fields

Combination Effects demo

Inneholder et fåtall komponenter for dynamiske nettsider. Noe for begrenset for vårt bruk.

# Tacos

<http://tacos.sourceforge.net/>

<http://opencomponentry.com:8080/tacos/app>

\$0 - Open source

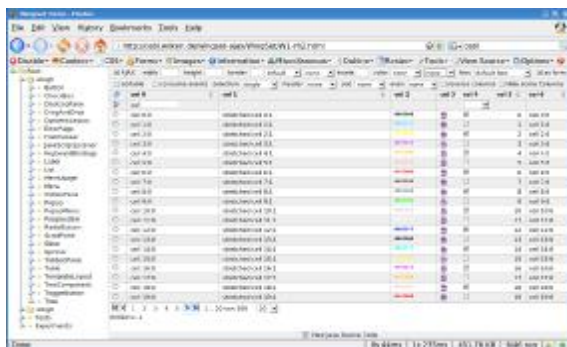

Enkle komponenter for noen enkle formål. For enkelt til at det kan brukes i en større sammenheng.

# Wings

<http://www.j-wings.org/>

<http://www.j-wings.org/snipsnap/space/Demo>

?

WingSet

Open Source Business Library

Swing på nett. Forsøk på å gjenskape komponenter og egenskaper fra Swing-biblioteket over til bruk i nett-applikasjoner.

# Yahoo! User Interface Library

<http://developer.yahoo.com/yui/>  
<http://gallery.yahoo.com/yui/>  
<http://developer.yahoo.com/ypatterns/>

\$0 - BSD license

## TreeView

Omfattende sett med komponenter for det meste av brukergrensesnitt. Brukes blant annet for å drive Yahoo Mail.

The Yahoo! User Interface (YUI) Library is a set of utilities and controls, written in JavaScript, for building richly interactive web applications using techniques such as DOM scripting, DHTML and AJAX. The YUI Library also includes several core CSS resources. All components in the YUI Library have been released as open source under a [BSD license](#) and are free for all uses.

# Grid komponenter

Komponenter for visning av kompleks data.

## ActiveWidgets Grid

<http://www.activewidgets.com/grid/>

\$2450

	Ticker	Company Name	Market Cap.
1	MSFT	Microsoft Corporation	314,571.156
2	ORCL	Oracle <input type="text" value=""/>	62,615.266

## CodeThat Grid

<http://codethat.com/grid/>

[http://codethat.com/grid/grid\\_examples.html](http://codethat.com/grid/grid_examples.html)

\$158 - Corporate

IE 5+/6+, NN 4+/6+/7+, Mozilla 0.9, Opera 5+/6+/7+

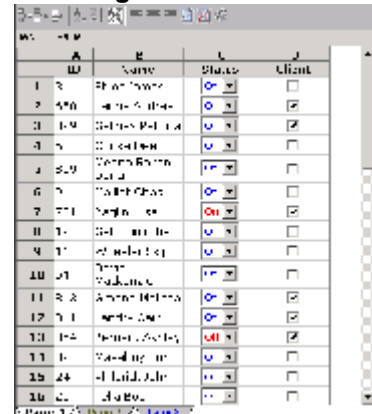

Flere rader side-flipper

Tilpasset editor

Filtrering av kolonne

API mot grid, sett stil m.m.

Live kalkulering

Skjema-elementer

Støttes av CodeThat Studio, som er et verktøy for å sette opp layout og innhold for deres javascript-komponenter.

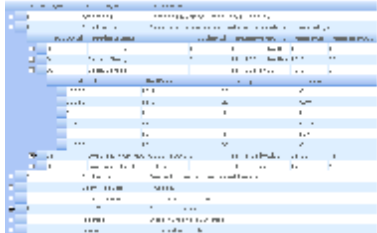

# ComponentArt Grid

<http://www.componentart.com/webui/demos/>

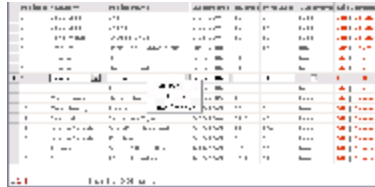

\$799 - Developer

Callback

Hierarcial callback

Editing

Searching

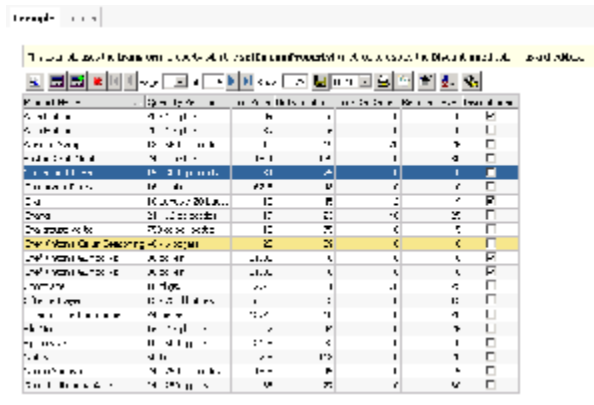

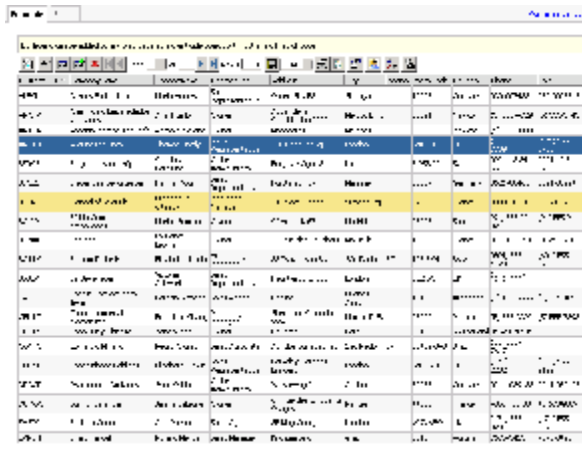

Støtter ikke sortering på klient-siden. Spør serveren ved forespørsel om sortering.

# DbNet Grid

<http://www.dbnetgrid.com/dbnetgrid/demos.aspx>

\$999 - Multi-user web server

<http://www.dbnetgrid.com/shared/dbnetsuite.aspx>

Kompleks grid med støtte for integrasjon mot Office. Fungerte ikke på vår installasjon av Office, dessverre.

# dhtmlxGrid

<http://www.scb.com/docs/products/dhtmlxGrid/>

GPL, \$149 - Commercial license  
IE 5+, Mozilla 1.4+, FireFox 0.9+, Safari 2.0+

## Flere themes

## Fortløpende redigering

## Flere header / footer

## Dynamisk innlasting

## Flere sider

## Publisering av hendelser

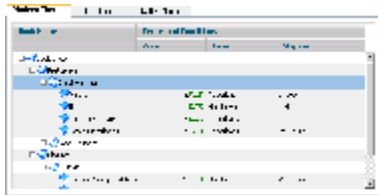

Rikt tabell-grensesnitt med integrert støtte for Ajax. Har også flere komponenter på hjemmesiden sin, med separat prising for hver og en. Pro-utgaven støtter også oppdatering av databasen.

- Full control with JavaScript API
  - Simple JavaScript configuration
  - Integration with HTML Form
  - Async mode loading support (AJAX)
  - Loading/Configuration from XML (file or string)
  - Ability to load big datasets (Smart rendering/paging)
  - Easy styling with CSS or predefined skins
  - Serialization to XML/SCV
  - Working with clipboard
  - Automatized communication with server data source ([dhtmlxDataProcessor](#))
  - Drag-and-drop rows/columns within grid
  - Drag-and-drop in/from [dhtmlxTree Pro](#)
  - Selectbox, combobox,checkbox, calendar and more [eXcells](#)
  - Math Formulas for cells
  - Ability to create any editor or cell formatting (using [eXcell](#) - eXtended cell object)
  - Invisible data blocks for rows/entire grid (userdata)
  - Resizable/movable columns
  - Client-side sorting (string, integer, date, custom)
  - Wide range of event handlers
  - Detailed [documentation](#)
- \* - some functionality available in [professional edition](#) only

# dhtmlxTreeGrid

<http://www.scbri.com/docs/products/dhtmlxTreeGrid/index.shtml>

GPL, \$249 - Commercial license

**Multiple themes**

Tree	-	J
Root		
Child 1	Child 1	Child 1
Child 2	Child 2	Child 2
Child 3	Child 3	Child 3
Child 4	Child 4	Child 4
Child 5	Child 5	Child 5
Child 6	Child 6	Child 6
Child 7	Child 7	Child 7
Child 8	Child 8	Child 8
Child 9	Child 9	Child 9
Child 10	Child 10	Child 10

**Basics**

Tree	-	J
Root		
Child 1	Child 1	Child 1
Child 2	Child 2	Child 2
Child 3	Child 3	Child 3
Child 4	Child 4	Child 4
Child 5	Child 5	Child 5
Child 6	Child 6	Child 6
Child 7	Child 7	Child 7
Child 8	Child 8	Child 8
Child 9	Child 9	Child 9
Child 10	Child 10	Child 10
Child 11	Child 11	Child 11
Child 12	Child 12	Child 12
Child 13	Child 13	Child 13
Child 14	Child 14	Child 14
Child 15	Child 15	Child 15
Child 16	Child 16	Child 16
Child 17	Child 17	Child 17
Child 18	Child 18	Child 18
Child 19	Child 19	Child 19
Child 20	Child 20	Child 20
Child 21	Child 21	Child 21
Child 22	Child 22	Child 22
Child 23	Child 23	Child 23
Child 24	Child 24	Child 24
Child 25	Child 25	Child 25
Child 26	Child 26	Child 26
Child 27	Child 27	Child 27
Child 28	Child 28	Child 28
Child 29	Child 29	Child 29
Child 30	Child 30	Child 30

**Extended tree**

- Smart XML Parsing to increase performance
- Dynamical loading of levels
- Drag-n-drop as child/sibling
- Split mode support
- Vertical mathematical summation
- Tree specific script API
- Tree specific sorting
- Tree specific rows coloring
- \* - as dhtmlxTreeGrid is an extended version of [dhtmlxGrid](#), it has all features and functionality of its parent.
- \*\* - demo shown above has only basic functionality of dhtmlxTreeGrid

# Ecruiser

<http://www.simplica.com/datatable.htm>

\$995

<http://www.simplica.com/ajaxdemo.htm>

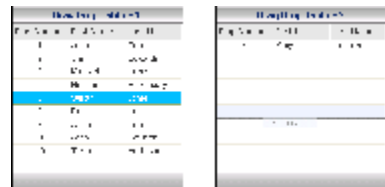

**DataTable Basic**

**Spreadsheet**

**AJAX Loading**

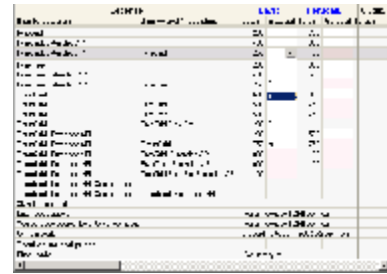

**Drag and Drop**

Integeres mot Java Server Faces. All sortering, datalagring og kalkulering skjer på server. Dette medfører en pause etter alle slike operasjoner.

# Editable JavaScript TreeGrid

[http://www.cogsoft.com/TreeGrid4\\_6/Html/EJSTreeGrid.html](http://www.cogsoft.com/TreeGrid4_6/Html/EJSTreeGrid.html)

\$1900 - Standard

## Fortløpende redigering

1 000 000 rader

## Flerlinjet redigering

Bildegalleri

## Skjema-elementer

Redigering av data

Rik på funksjonalitet. Demoene krever trykking på lagre-knapp for å lagre data til databasen. Er ikke sikker på om det kan gjøres automatisk.

# GridFX

<http://www.softwarefx.com/sfxNetProducts/GridFX/>

\$599

## Design-Time Experience

### Drag and Drop Editing

Move, split and stack columns by drag and drop within the Layout Editor on the Visual Studio 2005 design surface.

### Smart Tag Wizards

Take advantage of full blown context sensitive wizards where most of the functionality is readily available in a graphical way rather than a simple list of properties.

### In-Place Template Editing

Format the display of content through the WYSIWYG template layout of a given area without hiding the grid from view.

### Enhanced Property Grid

Selecting an item or area of the grid highlights the relevant section of the Property Grid and vice-versa.

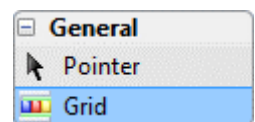

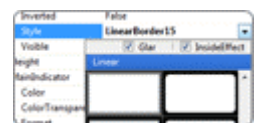

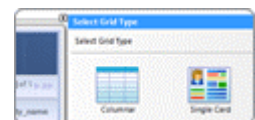

### Integration with Visual Studio 2005

Grid FX takes advantage of the Visual Studio 2005 extensibility model to offer a design-time experience that significantly decreases development time and the learning curve over traditional grid controls.

## End-User Experience

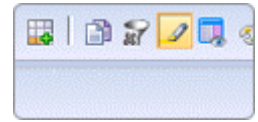

### FloatingBar

The FloatingBar provides end-users with per item features such as data copying, grouping, sorting & filtering, hide or show columns, plus font selection, size, style & color.

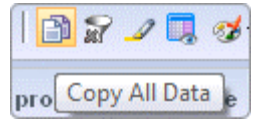

## Toolbar

The Toolbar provides options for the grid as a whole such as palette selection, adding a new item or data, on/off of highlighting or copying the data.

## Data Copy

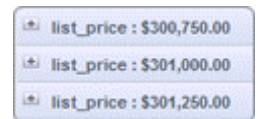

End-users may copy data from the entire grid, a specific item or column through the Toolbar and FloatingBar.

## AJAX Data Organization

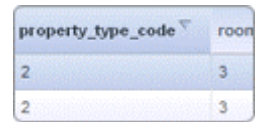

### Grouping

Combine items by unique, distinct and/or ranges of values - whether dates (including Outlook-style), numeric or alphabetical.

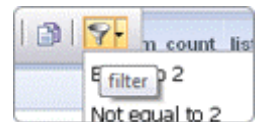

### Sorting

End users can order data in columns or in a hierarchical order of columns by ascending or descending alphabetical or numerical values.

### Filtering

From the FloatingBar, conveniently find additional, relevant data to a specific item.

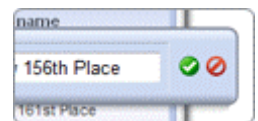

### Paging

Grid FX provides linear pagination of data with first, last, next, previous or specific page navigation.

### Data Editing

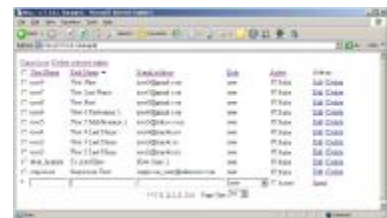

End users may insert, update or delete data within the grid through an in-place edit bar or a floating, modal record form - full security and validation supported. Initiated via the Toolbar (insert) or the FloatingBar (update and delete) or simply double-click (update) on an item and executed smoothly via AJAX

## Powerful PHP DataGrid

<http://coolstuff.support.googlepages.com/>

\$65

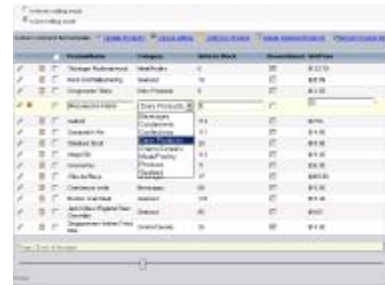

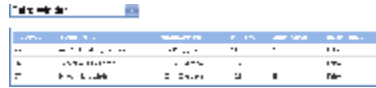

Integreres kun mot PHP og MySQL.

# RadGrid

<http://www.telerik.com/products/aspnet/controls/grid/>

\$399

**Outlook grid**

**Combo filtered**

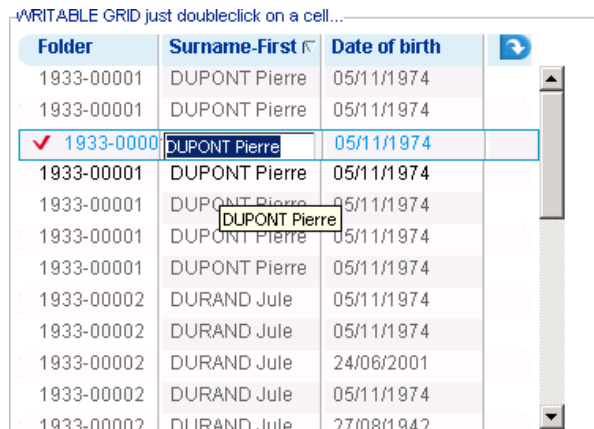

**Web Grid**

- **Built-in AJAX support** - dramatically improves the responsiveness of the component, simulates Windows-application like behavior, and minimizes the traffic to the server.
- **Codeless DataBinding using the DataSourceControls** introduced in ASP.NET 2.0
- **Data-Binding to business objects, sub-objects and nullable objects** (under ASP.NET 2.0)
- **Rich client-side functionality** - expand/collapse, delete, resize, reorder, select, scroll, etc.
- **Filtering for all built-in column types**, option for switching the default filter textboxes with other controls
- **Hierarchical grids with multiple tables at any level, self-referencing hierarchy**
- **Outlook style grouping for flat and hierarchical grids**
- **UserControls and Templates as Edit Forms**
- **Conditional Formatting**
- **Easily customizable skinning mechanism** (setting single Skin property of the grid)
- **Keyboard support**
- **Automatic, Multi-Column and Custom Sorting**
- **AJAX-based Virtual Scrolling** for instant navigation in large data structures
- **Standard, Alphabetical and Custom Paging, SEO-Friendly Paging, Pager Template Support**
- **Area and Multi-Row Selection**
- **Flexible edit form validation mechanism**
- **Various column types**
- **Option for AutoPostBack when clicking anywhere in a row**
- **XHTML 1.1 and Accessibility Compliance (WAG Level A)**

# Rialto Grid

Images

#### **Grid Cell Presentation**

You can dynamically change the presentation of each cell in the grid. The cell presentation is separate from its internal value. That is, all sorting and data aggregation are preserved. Also, you can dynamically change the style for each cell of the grid.

#### **Charts**

Create next generation charts. For example, you can use Macromedia Flash Player which creates FusionCharts.

#### **Scrolling and Column Headers**

You can have the Zapatec Grid scroll vertically and horizontally. This is similar to the Window Freeze Panes option in Excel.

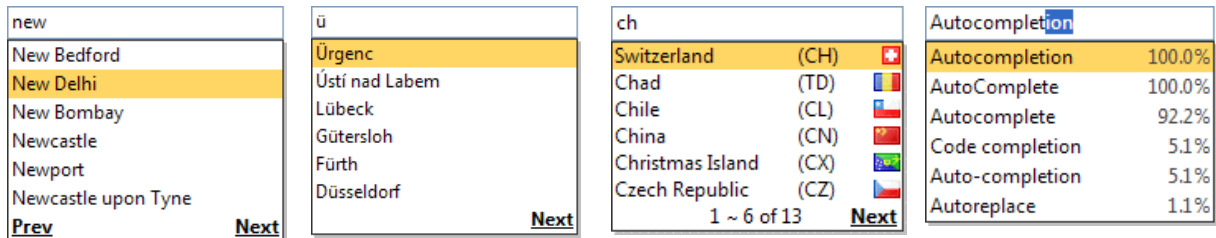

## Komponent enkeltstående

Enkeltstående komponenter som skal utføre en enkelt oppgave.

### Capxous AutoComplete

<http://www.capxous.com/>

\$399 - Ubegrenset lisens  
IE 6.0 7.0, FireFox 1.0 1.5 2.0, Safari 2.0

Autofullføring av oppslag, lignende som Google Suggest.

### Control.Modal

[http://livepipe.net/projects/control\\_modal/](http://livepipe.net/projects/control_modal/)

??

Tillegg til Lightbox som gir støtte for modale dialoger på hvilke som helst lenker.

### dHtmlxToolbar

<http://www.scbr.com/docs/products/dhtmlxToolbar/>

\$0

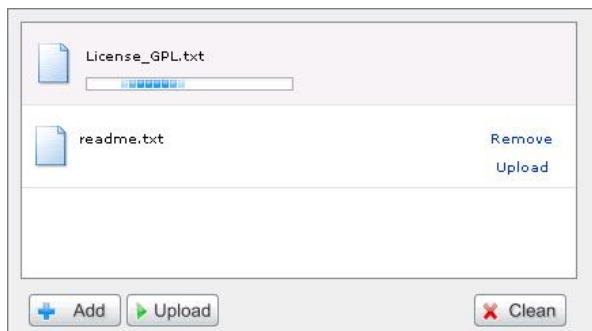

Verktøylinje med støtte for inline og tooltip hjelpetekster.

### dHtmlxVault

<http://www.scbr.com/docs/products/dhtmlxVault/>

\$99 - Commercial

Opplasting av flere filer. Viser ikke hvor langt hver fil har kommet i opplastingen, men viser hvilken fil som er i ferd med å lastes opp. På den måten får man et omtrentlig bilde av hvor langt man er kommet i opplastingen av denne gruppen filer.

## DisplayShelf

<http://www.quietlyscheming.com/blog/components/tutorial-displaysshelf-component/> - \$0 - MIT license

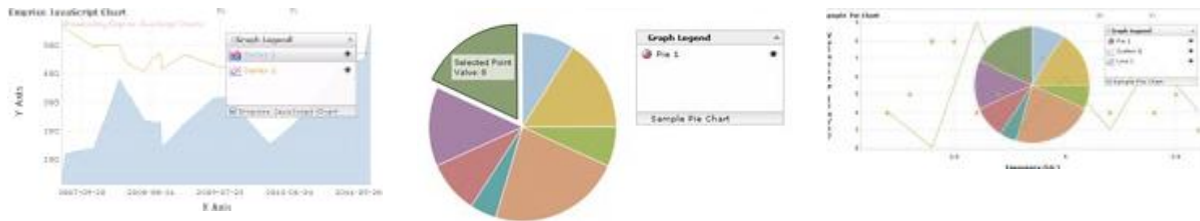

Bildegalleri som bruker flash i et pent 3D grensesnitt.

## Emprise JavaScript Charts

<http://www.ejschart.com/>  
<http://www.ejschart.com/examples/index.php>

\$1000 - Developer license  
IE 6/7, FF, Moz, NS, Opera, Safari, Camino

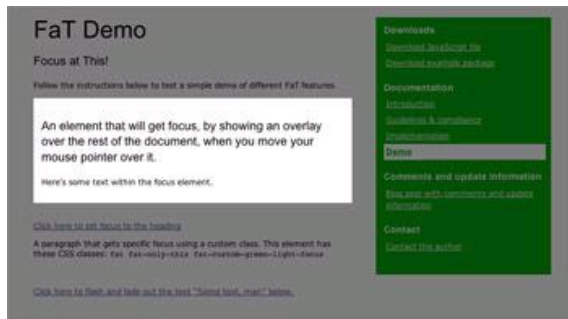

Visning av grafer med innebygd Ajax-støtte.

- **Interactive:** Features such as Hints, Mouse Tracking, Mouse Events, Key Tracking and Events, Zooming, Scrolling, and Crosshairs raise interactivity and user experience in web charting to a new level.
- **Axis Scaling:** There's no need to determine your data range before hand. EJSChart will calculate and scale automatically to fit whatever data it is presented with.
- **Auto Zooming, Scrolling:** Too much data and not enough screen real estate? Show it all. Let your end users zoom in on the pieces they're most interested in. Axis locking for single axis zoom, scrolling and automatic axis scaling are all included.
- **Stackable Series:** Multiple chart series can be stacked and combined to fit many charting needs.
- **Multiple Chart Types:** Line, Area, Scatter, Pie, Bar and Function series are just the beginning. New series are just a few lines of JavaScript code away.
- **Ajax-Driven Data:** EJSChart supports XML-formatted data and loads data on the fly. New series can be added and data updated in real time without page reloads.
- **Compatible:** Built with compatibility in mind and tested on all major browsers, you can be assured your charts will function consistently for the broadest range of end users. See the [full list](#) of compatible browsers.
- **Plugin Free:** 100% Pure JavaScript Charting Solution. No more worries of incompatible plugin versions or confusing security warnings. EJSChart is pure JavaScript and requires no client installation.
- **Customizable:** Every aspect of the charting display can be configured and customized through well-documented properties and methods. Want to do more than just change the color of the background? Need a series type which doesn't already exist? EJSChart is fully customizable and extendable to provide the greatest flexibility and integration for existing site designs and needs.

## FaT - Focus at This

<http://www.robertnyman.com/fat/>

\$0

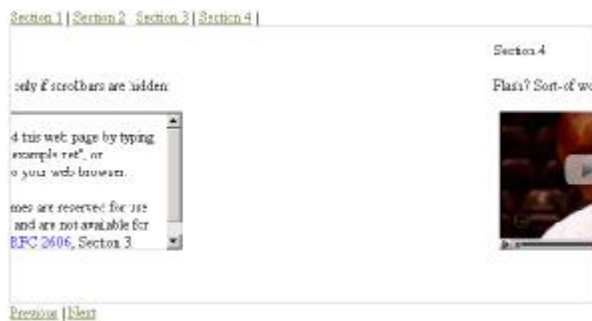

Markerer en del av siden som viktig ved å gråe ut resten av siden.

## Glider

<http://www.missingmethod.com/projects/glider.html>

\$0 ?

Lar deg skrolle mellom innhold horisontalt. Hopper mellom delsider glidende.

## InfoView

<http://www.infiview.com/>  
<http://www.infiview.com/demos/>

\$195 - Developers kit, \$STOP\_SECRET - Deployment

Tillegg til Bindows for visning av kart og diagrammer.

## Lightbox JS

<http://www.huddletogether.com/projects/lightbox/>

\$0 - Creative Commons license

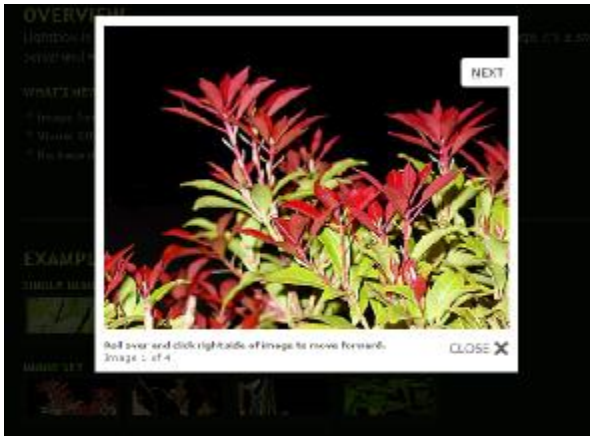

Visning av enkeltbilder i et overlay-vindu på nettsiden.

## Lightbox JS v2.0

<http://www.huddletogether.com/projects/lightbox2/>

\$0 - Creative Commons license

Visning av enkeltbilder og bildeserier i et overlay-vindu på nettsiden.

# Loupe

<http://www.netzgesta.de/loupe/>

\$TOP\_SECRET

Flytt forstørrelsesglasset for å se nærmere på et bilde. Åpner seg som en lightbox over nettsiden etter klikk på thumbnail.

# Photo-Caption Zoom

[http://randsco.com/index.php/2006/04/10/photo\\_caption\\_zoom\\_version\\_3](http://randsco.com/index.php/2006/04/10/photo_caption_zoom_version_3)

\$0 - Donation ware

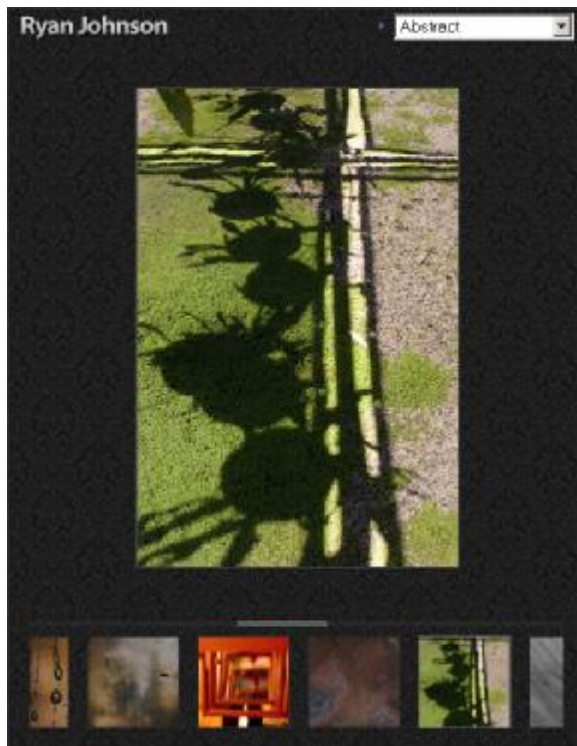

Ved plassering av musen over et thumbnail, blir bildet blåst opp noe, og undertekst pluss ramme puttes på.

## PhotoFolder

[http://livepipe.net/projects/photo\\_folder/](http://livepipe.net/projects/photo_folder/)

?

Bildegalleri som kjører i eget vindu.

## Prototype Window Class

<http://prototype-window.xilinus.com/>

??

<http://prototype-window.xilinus.com/samples.html>

Klasse for visning av vindu med innhold. Støtter maksimering, minimering til tittellinje, flytting og skalering.

## Select Something New

<http://easy-designs.net/articles/replaceSelect/files/final.html>

??

**Sample Form**

Select to Replace

This is option 1 ▾

- This is option 1
- This is option 2
- This is option 3
- This is option 4
- This is option 5
- This is option 6
- This is option 7
- This is option 8

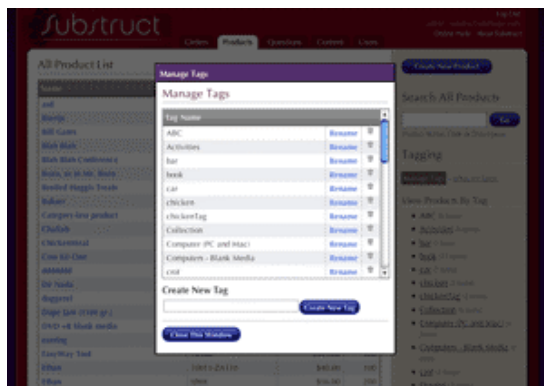

Alternative select-bokser. Erstatteer automatisk alle select-bokse på nettsiden.

## SubModal

<http://sublog.subimage.com/articles/2006/01/01/subModal>

<http://www.subimage.com/dhtml/subModal/>

??

Visning av modal dialog som et overlay-vindu på nettsiden.

## SWFUpload

<http://swfupload.mammon.se/>

\$0 - Donation ware

### Demo

Peplage can be used to provide links for uploading and processing capabilities directly in flash (as a solution for accessibility)

[Browse](#)  
[Upload files](#)

2 files queued

File queue:

Elegant måte å behandle opplasting ev flere filer. Krever støtte av Flash for å kjøre.

## Thickbox

<http://jquery.com/demo/thickbox/>

\$0 - MIT/GNU license

Visning av hvilket som helst innhold som et overlay-vindu på nettsiden.

## Timeline

<http://simile.mit.edu/timeline/>

Visning av en tidslinje med popup for hvert punkt. Skroller i flere hastigheter i høyden dersom man drar i bildet.

## TripTracker

<http://slideshow.triptracker.net/>

\$25 - Standard license, \$500 Premium license

Visning av bildegalleri over nettsiden. Gråer ut bakgrunnen og viser noen knapper på bunnen. Premium license er for sites med mer enn 100.000 besøkende i måneden. Kan nok utvikle noe lignende vha thickbox.

## Visual Quick Menu

<http://www.opencube.com/>

\$399 - Unlimited Sites

[http://www.opencube.com/qmv\\_vdesign/template1/template.html](http://www.opencube.com/qmv_vdesign/template1/template.html)

Avansert meny med mer. Har en online meny-editor der man enkelt kan sette opp stiler og innhold i menyen. Leverer også et produkt for å analysere brukeres bevegelser med musen over nettsiden.

## Interessante lenker

### Tapestry

<http://tapestry.apache.org/>

### Prototype JavaScript Framework

<http://www.prototypejs.org/>

\$0 - MIT license

Prototype is a JavaScript Framework that aims to ease development of dynamic web applications. Featuring a unique, easy-to-use toolkit for class-driven development and the nicest Ajax library around, Prototype is quickly becoming the codebase of choice for web application developers everywhere.

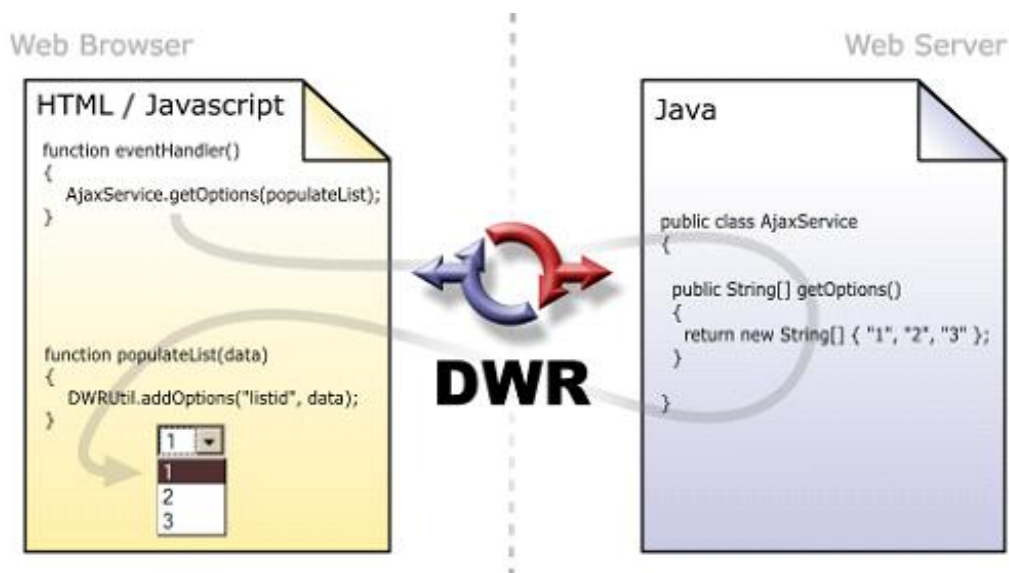

### Direct Web Remoting

<http://getahead.org/dwr/>

<http://getahead.org/dwr/overview/dwr/>

\$0 - [Apache Software License v2](#)

DWR allows Javascript in a browser to interact with Java on a server and helps you manipulate web pages with the results. DWR is Easy Ajax for Java

### MochiKit

<http://www.mochikit.com/>

<http://www.mochikit.com/demos.html>

Sett med JavaScript hjelpefunksjoner beregnet til bruk mot Ajax.

### Sarissa

<http://dev.abiss.gr/sarissa/>

\$0 - Apache 2.0 license

Sarissa is an ECMAScript library acting as a cross-browser wrapper for native XML APIs. It offers various XML related goodies like Document instantiation, XML loading from URLs or strings, XSLT transformations, XPath queries etc and comes especially handy for people doing what is lately known as "AJAX" development.

## **Google Gadgets**

<http://www.google.com/apis/gadgets/reference.html>

For integrasjon mot Google sitt gadget-bibliotek. Både for iGoogle og deres desktop gadget-program.
